\*\*\*\*\*

a Monday night at the South Country Library in Bellport Village and featured a large turnout for the Moriches Bay U.F.O. Crash Presentation. The presentation of the slide lecture was well received by the members and the public.

NOVEMBER 29th, 1991: The next membership meeting will feature a slide presentation on the History of the U.F.O. Phenomenon and will begin sharply at 6:30 P.M. on that Friday night in the South Country Library in Bellport Village.

DECEMBER 27TH, 1991: The December meeting will be held at the South Country Library in Bellport Village at 6:30 P.M.. It will feature a video presentation on the Face on Mars.

PLEASE NOTE: The slide lecture series for the November meeting is being prepared as a new presentation. In case the photo labs do not have the slides ready for the presentation by the meeting, LIUFON will present its STATUS REPORT I in its expanded presentation. All meetings are open to the membership and the public.

\*\*\*\*\*  
OPERATION LONG ISLAND SKYWATCH: The weekend observation trips have been canceled for the winter months. The program will resume in April.

\*\*\*\*\*  
DICK RUHL: Our ace researcher and investigator is recuperating at home from his recent heart attack and is progressing well. He sends his best to all the membership.

\*\*\*\*\*  
CONFERENCE DATE: Plans for an April Conference have been shelved at LIUFON due to budget problems arising from the recent costs incurred with our office machine repairs. Plans however are in the works for a October 1992 Conference.

#### LIUFON NEWS:

\*\*\*\*\* The "SHELTER ISLAND NEWS", ran an extensive article on LIUFON's recent talk at the Shelter Island Library. In the article, the paper gave extensive coverage to reports on recent and past LIUFON investigations which were covered in the Library talk. The paper also mentioned the Moriches Bay Case and the presentation put on by LIUFON on the incident. \*\*\*\*\* The reaction to the publication of the recent Moriches Bay U.F.O. Crash Retrieval Special Report II by LIUFON has been very favorable. One of our members, Elaine Douglas in Washington, D.C., wrote to congratulate LIUFON on the extensive investigation efforts by LIUFON's Staff into the case report. Her enthusiasm was more than appreciated by LIUFON's Staff, who by the way deserve a lot of credit for the Case Investigation. \*\*\*\*\* Thank you Elaine, once again,... wait until you see PART II !!!! \*\*\*\*\* Unknown to the membership, the full report has been recently published in Leonard Stringfield's recent Status Report on Crash Retrievals. Due to costs and postage fees, LIUFON can not publish the full report to the membership in one installment, but has to do it in three parts. Those members wishing the full report, can write and ask for a full copy. Please enclose a five dollar check for printing costs and shipping fees to the Post Office Box. Allow ten days for printing and shipping.\*\*\*\*\* LIUFON will shortly be making available a small selection of video tapes for sale to the membership which LIUFON has produced. Watch around the first of the year for information on the video tape selection. \*\*\*\*\* Those members who have endured the recent delays in the publishing of our newsletter deserve our thanks for being patient. Please accept our profound apologies for the production problems which led to the delays. \*\*\*\*\* As the winter months come upon us, let LIUFON remind you that the months of November, December, January and February are periods of high U.F.O. activity over the Island. Please report immediately all U.F.O. sightings to the Hotline immediately. \*\*\*\*\* 30.

\*\*\*\*\*  
Drawing of a Oval shaped U.F.O. reported by a witness over Whitestone, Queens on October 7th, 1991 at 9:30 A.M.. The drawing is by the actual witness to the sighting.

### THE WHITESTONE SIGHTINGS

CASE NUMBER: 0052-91  
SIZE: 50 TO 200 FT.

DATE: 10/7/91  
WEATHER CONDITIONS: CLEAR

FROM THE ARCHIVES OF THE LONG ISLAND U.F.O. NETWORK INC.

The subject witness is an employee of a trucking company that has a contract to transport mail for the U.S. Post Office. On the morning of the incident, he was picking up an interstate shipment at the loading dock of the Central Post Office in Whitestone which is near the Whitestone Expressway and is surrounded by residential and business areas. The gentleman who wishes to remain anonymous, but whom we will call David reported that as he turned and looked towards the direction of the Bronx across the river he observed an unusual object.

He reported that he saw a pulsating, blue-white object appear on the horizon rising above the Bronx. It appeared to be emitting a powerful blue, pulsating light, but appeared to be a solid object. It was considerably large in size and gave the appearance of being oval in shape. It rose at an angle on a heading of 150 to 170 degrees magnetic on a North to South East course. As it rose it began to accelerate to a speed that was estimated by the witness to be supersonic in performance. The witness watched the object during its performance and never lost sight of it. In seconds it disappeared as it past overhead to the South East.

The witness, who is a licensed pilot, has stated that the object was not any type of known aircraft that he is familiar with. It should also have been on La Guardia's radar, since its heading should have put it on their radar plots.

LIUFON has checked with contacts at the FAA who have been unable to verify any unusual air traffic that morning. The witness has filed a formal report with us. The case has been marked for further investigation, but has been given a high degree of credibility.

The drawing pictured above bears a striking resemblance to other oval shape objects reported this summer on the East end of the Island.

THE NATIONAL AND

INTERNATIONAL

UFO REVIEW OCT.: '91

GULF BREEZE FLORIDA: What has become to many Ufologists as the center for one of the most extraordinary U.F.O. flaps in history which began with the Ed Walters story in 1987, has developed into a flap of high intensity since the fall of 1989. This summer many residents and Ufologists, plus members of the news media, began keeping track of an elusive object that appeared over the Causeway Bridge. Beginning in 1990, Ufologists, media and local residents reported an object that appeared as an intense whitelight, which has appeared over the bridge since last year and has been observed and reported by the local press. This August, it was again seen, but with a different twist. Appearing as an intense red light, it appeared over the bridge and was observed to come lower and nearer. On this occasion and over several nights, it was photographed and reported to appear as a circle of intense lights and was also photographed and observed to have a ring of what appeared to be port hole lights. These sightings appear to continue and have caused nightly expeditions to stake out the Causeway Bridge. The activity in Gulf Breeze continues. ( LIUFON will feature a special report on the activity in the next newsletter ).

\*\*\*\*\*

THE FUND FOR U.F.O. RESEARCH: (Mount Rainier, Maryland): The Fund has recently published its recent quarterly report on its current efforts to assist in investigating U.F.O. phenomena. The Fund recently awarded a \$1000 grant to Michael Chorost, a Ph. D. candidate at Duke University to investigate the "Crop Circle" phenomenon. Immediately after learning that the mysterious patterns ( called "agriglyphs" ) had been appearing in the English countryside, the Executive Committee approved Chorost's request. During this period, National Board Member Richard Haines, Ph. D., proposed establishing a joint federation of U.S. and Soviet U.F.O. Research Organizations in an effort to pool information in a common research library. In the meantime, the Fund's Chairman, Bruce Maccabee, Ph. D., was in communication with Vladimir Azhazha, director of Soyuzufosentr which is a Soviet Coalition of Research Organizations. The effort was to establish greater cooperation between the two organizations. The Fund recently approved a request by Stanton Friedman for an additional grant to help in investigating the Gerald Anderson report concerning his involvement with the Roswell Crash. The grant will be used for polygraph tests. U.F.O. Researcher and Investigator Ann Druffel requested a grant for medical expenses in an abduction case involving a missing fetus. The grant will be used for paying for a medical doctor's consulting fee on the investigation. ( The Fund for U.F.O. Research, April - June 1991 Report )

\*\*\*\*\*

Puerto Rican Sightings: The recent report by LIUFON concerning the activity in Puerto Rico has brought a response from noted and respected UFO Researcher, Antonio Hueneeus, concerning media coverage of the Flap that is occurring in the Commonwealth. Antonio has informed LIUFON that Spanish T.V. and radio stations on the mainland have carried some reports of the sightings this past year. Mexican T.V. did this summer a one hour report on the Puerto Rican activity. The national media continues to ignore it. ( Source: Antonio Hueneeus )

This is another report filed by our friend, David, the gentleman who works for the trucking firm that helps to transport mail for the U.S. Post Office. This report was sent in along with his recent Whitestone Sighting and is a very interesting and intriguing report. It is presented here for our membership's edification.

David reported that he was on the loading dock of the old Flushing Post Office which was located in 1987 near Linden Hill section by Flushing Creek. The Post Office has since closed with the opening of the new Whitestone Central Processing Station. It was also near Shea Stadium and the flight path of La Guardia Airport.

David reported that it was 11:00 A.M. and a overcast day with a ceiling of perhaps 7500 Ft. He was looking to the West and observed a large boomerang shape object at 2500 Ft. altitude come in. It was dark gray or black and had a pattern of multicolored lights on the bottom. It was also totally silent and lacked any discernible features. He stated the object was difficult for him to see. Its surface appeared hard to discern and appeared to be hazy. The object continued its flight and was visible for at least 3 minutes. It also crossed several major flight paths for aircraft coming into La Guardia Airport and must according to David been picked up by the airport's flight control. He also noticed that there were no other aircraft in the area. It also passed directly over Shea Stadium on its path to the East.

David has also submitted a drawing of the object which appears on the front page of the newsletter. The object appears to be very close in its appearance to that of the famous Hudson Valley Boomerang objects which Phil Imbrogno has written so much about. It also has a striking resemblance to the Moriches Bay Incident Object which LIUFON has investigated. It would not be presumptuous to assume it may the same object reported in all cases or a similar object. The report filed by David has been given a high degree of credibility and has been listed in our archives as a unknown object.

---

**SPECIAL REPORT:**

## THE EAST RIVER SIGHTINGS

CASE NUMBER: 0054-91

DATE: April, 1991.

**TYPE: DIAMOND SHAPED.**

SIZE: UNKNOWN.

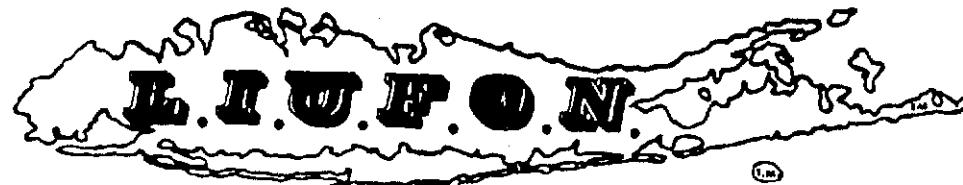

WITH ACCOMPANYING ROUND OBJECT.

WEATHER: CLEAR

This report was furnished by Sandra Hollander who is a LIUFON member and is from a neighbor and friend of hers who declined to talk to LIUFON directly. The report entails the sighting by her friend Mr. H. of a formation of two objects in late April at 2:00 A.M. in the morning on a unspecified date.

The location was from his apartment window at 129th Street along the F.D.R. Drive and the East River. He observed, after feeling a urge to do so, a bright round object which was in company with a diamond shaped object hovering out over the East River. During his observation he noted the diamond shaped object to be dark textured with rectangular structures in its center. The round object was also extremely bright and could not have been a planet or a aircraft. While observing the objects, he noted three light planes enter the area and attempt to approach the diamond craft, first from the front and then from the rear. Both times, the aircraft were unsuccessful. After watching the objects for awhile, he went inside and returned later only to find both gone. He noted both objects were totally silent.

He has told Sandra Hollander that he has seen since then the diamond shaped craft on several other occasions in the same position over the river. He has declined to be identified and refuses to talk to LIUFON directly.

# HELLO ISLAND SEE

\*\*\*\*\* The month of October like all months of the year was a busy one here at LIUFON's headquarters. \*\*\*\*\* In the beginning of the month, LIUFON conducted a hypnotic regression session with two professional, licensed hypno-therapists supervising the session with the young woman from the West Islip Abduction Case. \*\*\*\* The young 27 year old nurse was regressed back to the first conscious abduction she recalled which occurred at her home on the night of May 27th, 1990. Located in a residential neighborhood of West Islip, the home was visited on that night by a ship which had two eight foot tall humanoids enter her home and remove her with the assistance of a Lizard creature which first awakened the young terrified woman. Removed from her home to the ship which had landed in her backyard, she entered and was subjected to various physical examinations by the usual four foot Greys. During the session, she became very terrified ( wouldn't you under the circumstances ) and had to be brought back from the regression . The session was a success, in that it was able to prove that the young woman had been abducted. Further work on a second session will be done in the beginning of November and a report will be found here on the success of that session. \*\*\*\*\* In the several special reports in this month's newsletter dealing with activity in the areas of Queens and Manhattan, it appears that the areas of New York City are undergoing increased U.F.O. activity. ( See the special reports in the beginning of the newsletter) \*\*\*\* It is no surprise, since LIUFON has had reports of U.F.O. activity in those Boroughs of New York before. \*\*\* And the skeptics say that U.F.O.'s don't appear over major Cities, they should answer our Hotline some night. \*\*\*\*\* Activity has been reported by the Ronkonkoma Case couple who were taken from their home in November of 1989. The wife reported being subjected to some sort of gynecological examination which resulted in massive bruises around her lower body. LIUFON was able to secure photographs of the bruises with the co-operation of the woman. The Case is still being monitored by LIUFON. \*\*\*\* The Medford Abduction Case has also resulted in several massive scars and bleeding from the husband of that family in the later part of October. It appears that the man was the object of forced sperm removal which resulted in scaring from the procedure. It is quite possible a result of his resistance to his recent abduction. \*\*\*\* The Medford Case also involves that family's children, who have also reported seeing strange creatures in their bedrooms at night. Drawings submitted to LIUFON Investigators indicate similarities to other young children's drawings who have strong experiences similar to the Medford Case children. \*\*\* Reports of more abductions are coming into LIUFON's Hotline each month. It appears that more abductions are occurring here on the Island and may indicate more activity in the future. Only time can tell where it is all leading. \*\*\*\* Reports of sightings are increasing also. The activity does not seem to diminish at all but continues unabated with recurring periods of frequent sightings. It seems that the seventies flap never died down here, but moved on into the eighties with no let up into the nineties. \*\*\*\* 30.
